Re: 155th Avenue and Naples Street Culvert Replacement Construction Projects

Per the direction of the Coon Creek Watershed District, the City of Ham Lake is removing and replacing the existing culverts located on Naples Street at County Ditch #11 and 155th Avenue at County Ditch #44-9. The contractor, Peterson Companies, Inc. is tentatively scheduled to start removing the existing culverts the week of August 28, 2017 weather and contractor schedule pending. The contractor plans to complete the installation of the new culverts and grading/seeding in approximately one week. Keep in mind that unforeseen conditions such as weather may arise and prolong the time it takes to complete the project.

The contacts for Peterson Companies, Inc. are:

Justin Randall – Project Superintendent Phone: (651) 276-7637
Zachary Milton – Project Manager Phone: (651) 257-0360

Prior to start of the culvert replacement work, Minnesota Gopher State One will locate and mark utilities, such as electric, gas, telephone, and cable TV. Please do not move or destroy any flags, stakes, or markings. This will allow the Contractor to get an accurate location of the existing utilities and construction limits.

During culvert removal and installation, the roads will be temporarily shut down. Please use caution when approaching running machinery and await eye contact or a hand signal prior to passing for the safety of all parties.

If you have any questions, comments or concerns about the project contact me by phone at (763) 862-8000 or by email at aweniger@rfcengineering.com. Throughout construction the RFC Engineering Webpage will be updated with project notices and status updates at:
